MAP LIBRARY DIVISION

will continue

~~The mission of the Map Library Division is to provide an up-to-date map reference service and to coordinate foreign map procurement from domestic and foreign sources in behalf of the mapping community of the government. The three functions listed below are intimately inter-related and interdependent, and do not reflect a priority order.~~

identified only for the purpose of showing the allocation of manpower to the larger map library program segments.

1. Coordinate, direct, and support the joint-Agency foreign map procurement program through the Department of State; coordinate mapping Agency requirements for collection of foreign maps by domestic and foreign clandestine means; and develop information on and propose courses of action relative to foreign mapping programs subject to support by the United States.

31%, of this 25% is for support for foreign procurement, and 6% is for domestic procurement

2. Maintain a central collection of intelligence maps and related geographic publications, to include cataloging, filing, and Charge Desk duties, and the issuance of periodic joint-Agency map acquisitions lists.

43%

3. Provide a complete map reference service, to include guidance to analysts in the exploitation of the collection, aid in identifying geographic features and names, and selection of map materials for Vital Storage.

10%

4. Administrative support -- 16% of which 8% could be charged to the Procurement function, 6% to the Processing function and 2% to the Reference function.
